The Philippines: Impact of The Aquino Investigation Findings

Summary

Increasing evidence suggests that the board of inquiry into the Aquino assassination is moving inexorably to implicate the military in the murder and charge the government with an orchcestrated coverup -- a development that could have far reaching political consequences for President Marcos. Board's finding will come as little surprise to most Filipinos, who have suspected government complicity from the beginning. Nonetheless, a public and official indictment would aggravate existing rifts in the Armed Forces, and could lead to renewed antigovernment demonstrations and impede Marcos's efforts to ensure a convincing victory in the National Assembly elections in May. The imminent unraveling of the government's efforts to limit the damage from the Aquino assassination also serves as another sign of rough seas ahead over the longer term for Marcos and political stability.

The Board's Findings 25X1 Agrava Board could wind up its investigation as early as March by 25X1 military officers in the implicating senior assassination of Benigno Aquino. 25X1 25X1 This memorandum was prepared by Islands Branch, Southeast Asia Division, Office of East Asian Analysis of the Directorate of Intelligence. National Assembly elections. Under these circumstances, the assassination would be revived as a political issue at a time when Marcos and his ruling party face a critical test of popular support and the electorate prepares to vote. Public indignation at the official tolerance of a coverup, moreover, could combine with unhappiness over austerity measures implemented since late last year at the insistence of the IMF. This increases the likelihood that the Board's findings would become a catalyst for large and perhaps violent antigovernment demonstrations.

25X1

If the findings are released next month, well in advance of the elections, Marcos at a minimum will face renewed pressures from his political opponents, the business community, and the Church to investigate the crime further, name the people responsible, and bring them to justice. Opposition groups would probably stage demonstrations demanding Marcos's resignation if he continues to permit officials in his government to "protect" those responsible. Opposition efforts to force the removal of General Ver, which began shortly after the Aquino assassination, would be taken up with renewed vigor if the public becomes convinced that he ordered the coverup to protect himself or his associates.

25X1

Marcos's opponents also might make their participation in the National Assembly elections contingent on additional progress in the investigation—an outcome we cannot discount entirely. Marcos already faces at least a partial boycott of the elections, and further intransigence on investigating the assassination might push all moderate opposition groups to boycott. A total boycott would further erode business and international financial confidence in the regime, and revive questions about the ability of the government to withstand a succession crisis. Marcos would have little room to maneuver under these circumstances to ensure broad participation in the elections, particularly if pursuing the investigation would only further tarnish his regime.

25X1

Can Marcos Defuse the Assassination as a Political Issue?

No matter what course the investigation takes in the coming weeks, the Aquino assassination has irreversibly damaged Marcos's credibility. His regime will almost certainly continue to suffer from the public's perception that high level civilians and military officers are culpable, even if, for example, he drags out the issue by promising to probe further into the Board's findings. In our judgment, Marcos will probably never be willing or able to make those individuals responsible publicly accountable for their actions. For that reason, notwithstanding the Board's actions during the next several weeks, we believe that the assassination will continue to haunt Marcos as critical financial negotiations continue and demands for political reform escalate.
